

Green Country INFLATABLES LLC

Operating Procedures

Each operator should read and understand the following instructions.

1. All riders must remove their shoes.
2. Riders must remove loose or sharp objects including glasses and dangling jewelry.
3. No food, drink, water, gum, cake, animals, silly string, or sharp objects.
4. The ride should not be operated if wind exceeds 25 mph or in rain or lightning conditions.
5. No more than 6-10 riders at a time, depending on the size and age of the children.
6. Only riders of the same size should be allowed in the ride at the same time.
7. The operator must remain in control of the ride at all times.
8. The operator should assist the riders when they enter and exit the ride.
9. The operator should position himself/herself in close proximity to the entrance of the ride.
10. While the ride is in operation, the operator should watch the riders at all times. No roughhousing or horseplay should be tolerated. No climbing on the nets is allowed. Anyone who does not obey the rules after being warned should be asked to exit the ride (operators should be made to understand that they are in control of the ride...and removing someone from a ride who is not following rules is important for all riders' safety)
11. The operator must strictly enforce the rules posted on the warning sign.
12. At no time should the unit be operated under the influence of any intoxicating substance.

Emergency Procedures

Emergencies can arise for various reasons. The following are a few examples of emergencies and how they can be handled. This is strictly a guide...please use common sense when an emergency occurs.

Weather

Bad weather can arrive in the form of rain, lightning or strong wind. In each case you want to evacuate the ride as quickly and safely as possible.

- **Remain Calm!** If you panic your riders may also panic. Stay calm and stay focused on your job, which is to help your riders exit the ride quickly, but in an orderly fashion.
- After everyone has exited the ride, deflate the ride by turning off the blowers or fans.
- Mazes should be folded and taken to a protected area out of the weather. Bounces should be folded over once so that the interior is protected from the weather.

Loss of Electrical Power

When a loss of power occurs the ride will slowly start to deflate.

- **Remain Calm!** You will have ample time to help your patrons quickly and safely exit the ride. This situation tends to cause panic...unless the operator stays calm and relaxed. Talk calmly to those inside the unit telling them not to panic while you're helping them walk out.
- Check to see if the blowers have come unplugged or the cords are unplugged from the outlet. If so, plug them back in and the ride will re-inflate.
- Contact or have someone contact Green Country Inflatables, LLC at 918-809-3909 to check the problem. Do not leave the ride unattended.

Damage

If the ride becomes damaged while in your operation, please take the following steps.

- If the ride is ripped or otherwise begins to lose air, assist all riders from the ride and deflate it.
- Write down what happened, when, and any other details you observed and turn this report in to the Responsible Party.
- **Contact Green Country Inflatables, LLC at 918-809-3909 immediately. Do not attempt to continue to operate the ride.**
